Problems with Current Video Conferencing Tools

Audience

Focusing in Online Meetings is hard

- Limited Interaction with Presenter
- Hard to focus for a long time
- Might feel invisible/ unimportant

Presenter

Keeping Your Audience's Attention is a Challenging Task

- Limited Interaction with Audience
- Hard to keep track of audience's attention
- Not able to understand general emotions toward the presentation

Proposed System

Audience

Focusing in Online Meetings will not be disturbing

- No personal info stored or shared with third parties
- Give real time feedback to the presenter about the quality

Presenter

Keeping Track of Your Audience's Attention Easily

- Create or join an online presentation
- See real time attention and emotion analysis
- Get feedback including charts for attention rate over meeting at the end of the meeting

Project Health Card

Free Trial

This covers the overall project status of different factors associated with the project, you can alter them as per your requirements

Overall project status is Green.

Schedule

The Project Schedule is on Track

Task Allocation

Task Allocation is Adequate

Scope

Project Scope is Ahead

Risks

Some Risks Need More Attention

Issues

Some Issues Need Attention

Technology Integration

Technology Integration Needs Research

Created by Paint S

Current Status

	Django - React - Agora	Attention and Emotion Analysis
Completed	• Login • Register • Contact Us	• Drowsiness Detection • Eye Blink Detection • Talk Detection
In Progress	• Create Meeting • Join Meeting • Profile	• Emotion Recognition • Eye Gaze Tracking
